4 REASONS TO ADOPT HENS!

For delight in food:

Every day, you will get good fresh, natural and free eggs (150 to 300 eggs per year depending on breed) to delight the whole family. Yum yum!

For love:

Hens are truly affectionate and endearing Pets. Taking care of them, feeding them and picking up their eggs is a real moment of happiness for young and old.

For ecology:

They are the anti-waste solution! They feed on all organic, plant and vegetable waste, as well as your leftovers. Result: three times less waste by having two hens.

For the practical side:

They help weed the garden. They clean the soil of the small animals that your plants do not appreciate. They will be the gardener's right hand man.

Did you know?

Hens are very sociable, and cannot be alone, raise at least a pair. Ideal for a family of four. Whether you are professional or amateur, discover in this new Chick'a catalogue, all hardware, accessories, housing and food for the well-being of your hens and other fowl-like birds.

Our experts have selected with care products of quality, which are innovative, practical and aesthetically pleasing, thus covering all the needs of the backyard, without forgetting our close friends the rabbits.

NICE DISCOVERY!

INCUBATION

**Amateurs or professionals,
each to their own incubator!**

INCUBATION

AUTOMATIC DIGITAL INCUBATORS

Hatch your chicks in optimal conditions with the Borotto incubators!

1.

LUMIA 8 Incubator Patented automatic digital

Power supply 220V or 12V. Made in Italy. 2 years warranty / Capacity: 8 eggs (hens, geese, turkeys) or 32 small eggs (quail, partridge). Max. power 50W. Dimensions: 39x22x20cm.

① 530300008

Automatic incubator 8 eggs. Automatic turning. Digital temperature. Outdoor filling.

2.

LUMIA 16 Incubator Patented automatic digital

Power supply 220V or 12V. Made in Italy. 2 years warranty / Capacity: 16 eggs (hens, geese, turkeys) or 64 small eggs (quail, partridge). Max. power 60W. Dimensions: 39x34x24cm.

② 530300016

Automatic incubator 16 eggs. Automatic turning. Digital temperature. Outdoor filling.

Advantages of the LUMIA

- In Heat-Resistant ABS with Biomaster.
- Lumia 8: A small, technologically advanced, high performance machine. Its elegant design with "smart" technology makes this machine smart and easy to use and one of the best in its class.
- Lumia 8 stems from a desire to make the miracle of life available to all. It includes the highest professional incubation technology aimed at those with a limited number of eggs. The same technology that Borotto uses in larger models that can reach a higher level of accuracy and reliability.
- Lumia 8 is designed and built to better meet farmyard poultry and valuable species breeding requirements. Thanks to the use of innovative materials and a functional and ergonomic design, Lumia 8 is an indispensable instrument that is easy to use, both for the professional breeder and for all new breeding enthusiasts who want to try breeding farmyard animals for the first time, with expectations of a good result.

SEMI-AUTOMATIC DIGITAL INCUBATORS

For their healthy development, eggs need to be incubated, whereby incubators come into play. To watch your chicks hatching live on-line, "incubate them" with attention!

6.

7.

Digital semi automatic incubator Borotto

Our digital incubators are designed to be simple and straightforward to use, at the same time offering innovative technical solutions and high reliability. Digital display. It is possible to set the temperature from 30°C to 40°C with 0.1°C steps by pressing the (+) and (-) buttons (Programme Mode). Inspection windows allow to follow each phase of the incubation. Mouths to fill the water trays from outside, avoiding the opening of the incubator and the dispersion of heat and humidity.

PATENTED AUTOMATIC HUMIDIFIER FOR INCUBATORS

Humidifier that allows water to enter into the incubator automatically without any operator intervention. Variable humidity range of 40% to 75%. Works with incubators with capacities of up to 500 eggs. Designed for Borotto machines, but adaptable to the use of incubators of any brand. Thanks to the patented humidifier, it is possible to achieve and maintain the proper level of humidity during incubation and it optimizes the hatching, whatever the humidity variations incubated of the environment. It enables to optimize the hatching rate of the brooded eggs. Very easy to install.

INCUBATOR ACCESSORIES

Proportion of air on the inside of the egg.

2.

Egg spotters

This product is intended for the control of egg incubation. Using this egg spotter, you can check for the presence of cracks on the shell and the fertilisation of the egg and the stage of development of the embryo. Works on area 220V. maximum power: 15W. Delivered with two rubber inserts.

530002010

2 Egg spotters

3.

Egg spotters advices

Apart from the presence of cracks and the stage of development of the embryo, you can also inspect the proportion of air inside the egg.

Indeed, this percentage allows you to determine and adjust the level of humidity of your incubator, which is essential to the success of a good breeding. The diagram on the left shows the correspondence between the proportion of air and the number of days of incubation. Adjust your humidity as a function of the air proportion observed.

Beware of predators

Hens attract predators (foxes, etc.), be sure to secure their homes thanks with mesh.

CLEANING AND DISINFECTION

Non-calcined diatomaceous earth

Not toxic for humans, it can be used both indoors and outdoors. Free of chemical products, diatomaceous earth is known for being a natural insecticide which eliminates red mites, fleas and ticks. Ideal for sanitising chicken coops, it can also be used to absorb the smells of family pets. Simply sprinkle the diatomaceous earth on the animal, rub it in and brush to get rid of parasites.

Used in organic farming, diatomaceous earth fertilises the soil, favours plant growth by aerating roots and prevents colonisation by slugs.

Also found in feed additives, diatomaceous earth is completely safe to use when it is non-calcined. It thus helps to eliminate smells, protect animals against mites, fleas and ticks and absorb humidity in chicken coops without risk. Effective for sanitising chicken coops and on family pets such as cats and dogs. Diatomaceous earth also combats bed bugs, cockroaches, beetles and ants.

GREEN PLASTIC LINE

Green line feeder with hopper anti-pests

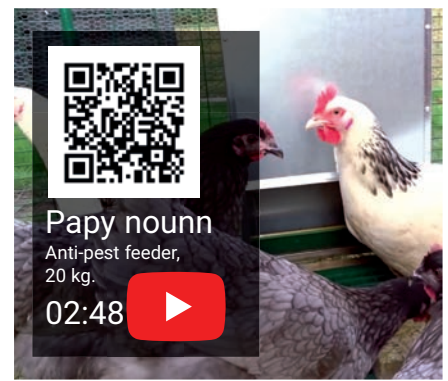

Succumb to this ultra-convenient feeder with its reserve of 12 or 20kg. It makes life easier while taking care of your hens! Our UKAL experts have selected this feeding trough for its 4 advantages:

- Practical: The filling of the feeder is done on top with a hinged lid, moreover the pedal in plastic grill facilitates cleaning and avoids the accumulation of droppings.
- Protected: The feeder is opened by pressing

the pedal, triggered by the weight of the animal. Pests (rats, mice, sparrows, etc.) cannot open it because they are too light.

– Resilient: Produced in galvanised sheet metal of quality, this feeder can remain outdoors thanks to its anti-rain system that prevents water from seeping inside.

– Rational: An anti-waste grill prevents a significant loss of food. By adjusting the sensitivity of the pedal, this feeder is suitable for all species of ducks, hens, pheasants...

How to choose a feeder?

There are different types of feeders:

- The basic feeder: large, rectangular or not, where chickens peck.
- The feeder with hopper: distributes food, which avoids wasting grain.
- The feeder with automatic opening: often fitted with a pedal, its opening is automatic by the weight of the chicken.

How to choose a feeder ?

There are different types of feeders:

- The basic feeder: large, rectangular or not, where chickens peck.
- The feeder with hopper: distributes food, which avoids wasting grain.
- The feeder with automatic opening: often fitted with a pedal, its opening is automatic by the weight of the chicken.

RINGS

Plastic rings to identify couples
or the year of reproduction.

RINGS

The good size for each one

Large breeds:

- Orpington, Marans, Wyandottes, Sussex, Rhode Island = hen diameter 20mm and cock diameter 22mm,
- Faverolles = hen diameter 22mm and cock diameter 24mm,
- Brahma = hen diameter 24mm and cock diameter 27mm,
- Padua, Brahma, Gauloise, Gournay, Leghorn = hen diameter 16mm and cock diameter 18mm.

Dwarf breeds: (some breeds below exist also as larger breeds)

- Silkie (Black silkie) = hen diameter 12mm and cock diameter 14mm,
- Golden Ardenes, Watemaël brill, Antwerp brill quail = hen diameter 9mm and cock diameter 10mm,
- Nagasaki, Wyandotte = hen diameter and cock diameter 12mm,
- Beijing = hen diameter 14mm and cock diameter 14/16mm.

RINGS WITH CLIPS

Easy to use and reliable.

4 diameters: 8,12,16 and 20mm.

At what age can we ring?

Ringling takes place in general at 7/8 weeks, after that the leg is too big to be able to slide the ring on.

Which precautions should I take?

Be careful to choose the right size and favour the official ring. This will avoid incommoding the animal (ring that is caught in branches...) For cocks, take care to replace the ring over the front spur before it is too big.

WELL PLUCKED

The essentials for plucking
your poultry well

WELL PLUCKED

ELECTRICAL PLUCKER

Convenient and easy to use.

Family electrical plucker

Is used for plucking chickens, hens and all similar animals. Beforehand, the animals will have to be immersed in 50-60°C water for 2 to 3 minutes. They can then be plucked by placing them on the roller equipped with rubber fingers that removes the feathers by turning. Height: 75 cm. **Max 6kg.**

560005
Family electrical plucker 24 fingers

560005001 
Fingers for plucker ref 560 005
Supplied by 24

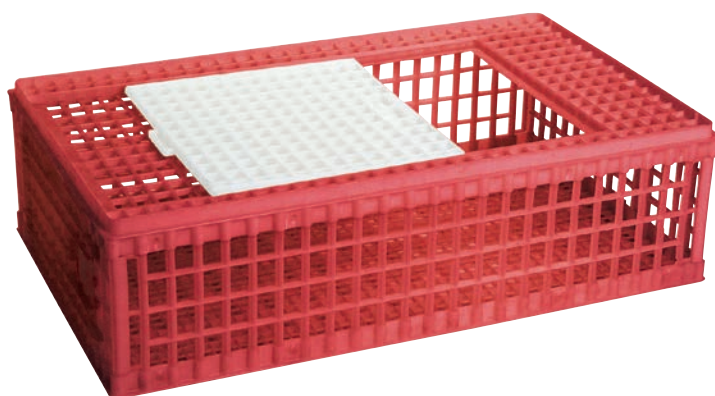

9560005001
Electrical plucker feet

Did you know?

If the temperature is too low, the feathers will be difficult to remove. On the other hand, a temperature that is too high will result in a browned skin and/or the grubbing up of the skin tearing.

TRANSPORT

Plastic poultry transport cage

The perfect asset to transport your chickens! It has an upper opening thanks to a sliding door. It is also available with a side door. Dimensions: 95x58cm.

590020
28cm upper door

2.

3.

Glasses with pins

Glasses with pins to avoid pecking between poultry. Glasses partly hinder the view of the poultry and avoid it being attracted by the colour of the wounds of its congeners, and therefore to peck at them.

580010

1 Hen glasses with pin by 100

580012

Glasses pheasant partridge with pin by 100

Plastic feeding tube to force-feed geese

For the force-feeding of geese. Plastic funnel, screw and metal. Very strong and effective.

580020

2 Length 24cm

Metal clamp for wings

Prevents poultry from flying away. Operating advice: Close the wing of the poultry. Clamp the feathers of the arm and forearm, without touching the flesh. Screw by tightening strongly.

SMALL EQUIPMENT

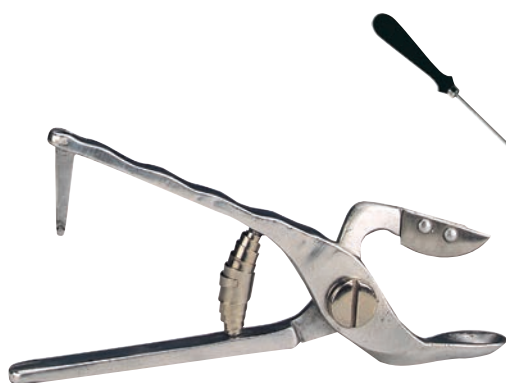

How to pluck a bird well?

Before plucking, the animals have to be immersed in a water from 60°C to 70°C.

- Chickens: 65-70°C for 30-45s.
- Geese: 65-70°C for 60-120s.
- Ducks: 62-68°C for 60-120s.

Then they can be plucked by placing them on the roller equipped with rubber fingers that removes the feathers by turning.

Then think of immersing the chicken in cold water in order to preserve the sanitary quality of the animal and to improve its presentation.

Poultry sacrifice pliers

The subject must be suspended by the legs at a good height. Take the head in the left hand, press firmly with your thumb at the base of the skull. The beak of the poultry is then wide open. Insert the blade of the flat clamp so that it is placed in the bottom of the throat. Make a quarter turn with the clamp to bring it vertically so that the recessed part carried by the other branch of the clamp is placed on the skull, just behind the ridge, the tip of the blade must be at the bottom of the slightly inclined throat. When the clamp is in place, close it vigorously. The bleeding must be abundant, the muscles relax which allows a fast and efficient plucking.

Capacity: 1 to 3 rabbits - Dimensions on the ground: 52x135cm - Dimensions overall: 65x145x101cm. The house for rabbits: summer or winter, this magnificent hutch will wonderfully accomodate rabbits and other rodents. Fully equipped: roof covered with asphalt canvas, shed 60x52x50cm, drawer for droppings, outdoor access door to the shelter, hatch between the shelter and the pathway, access ramp to pathway with grilling, 2 external access points to the pathway. In stained pine.

595415

③ Delivered as a kit, easy fitting

Did you know?

Intelligent and lively creatures, the rabbit needs to play to occupy itself and be stimulated as much mentally as physically. If you leave it alone and without occupation, it is likely to get bored and in reaction, to develop abnormal behaviours such as eating excessively, tearing hair or even damaging furniture if you leave it out of its cage.

DRINKING TROUGHS

Bottle holder drinking trough

Drinking trough oval base.

610001002

4 Delivered with the support

Bottle holder drinking trough

Drinking trough rectangular base.

610001003

5 28x19x10cm

FOOD SUPPLEMENTS

To give them strength!

6.

CHICK'A GNAWING BLOCK ALL RODENTS

Mineral food supplement rich in trace elements and mineral salts (calcium, phosphorus, sodium, magnesium). Regulates dental growth. Improves bone mineralisation. Facilitates digestion and regulation of the neuro-muscular system. Also helps regulate the growth of teeth by regularly

wearing them down, as they grow all through the rodents life. Operating advice: Place the gnawing block in the cage ensuring that it isn't in contact with drinking water and urine of the animal. Ideal for rabbits but is suitable for all rodents.
